SYSTEM INTEGRATION PRODUCTS & SERVICES OFFERED BY US

SYSTEM INTEGRATION

Harnessing the power of technologies requires businesses to overcome complex systems integration challenges. Systems Integration is the process of connecting the systems and applications across an organization to deliver efficiency, enhanced functionality, and cost savings for the recipient organization. SFT's system integration services resolve disconnects between the different business systems you leverage. We have partnered with the leading global brands that have set the benchmarks of quality and are a go-to solution for any IT need.

Check out the services offered below

DESKTOPS, LAPTOPS & WORK STATIONS

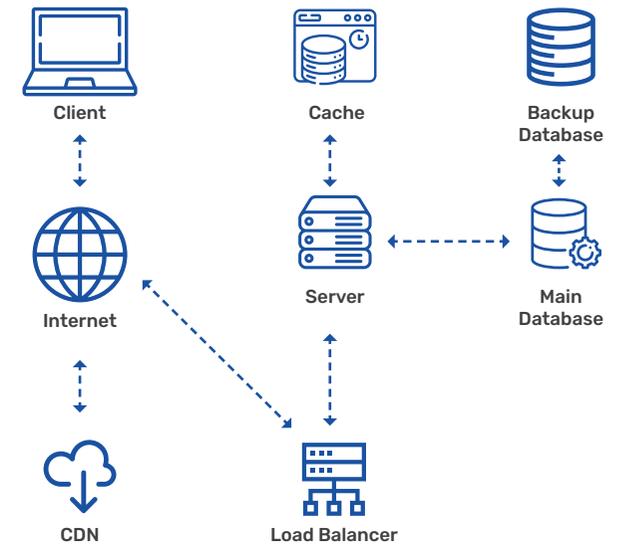

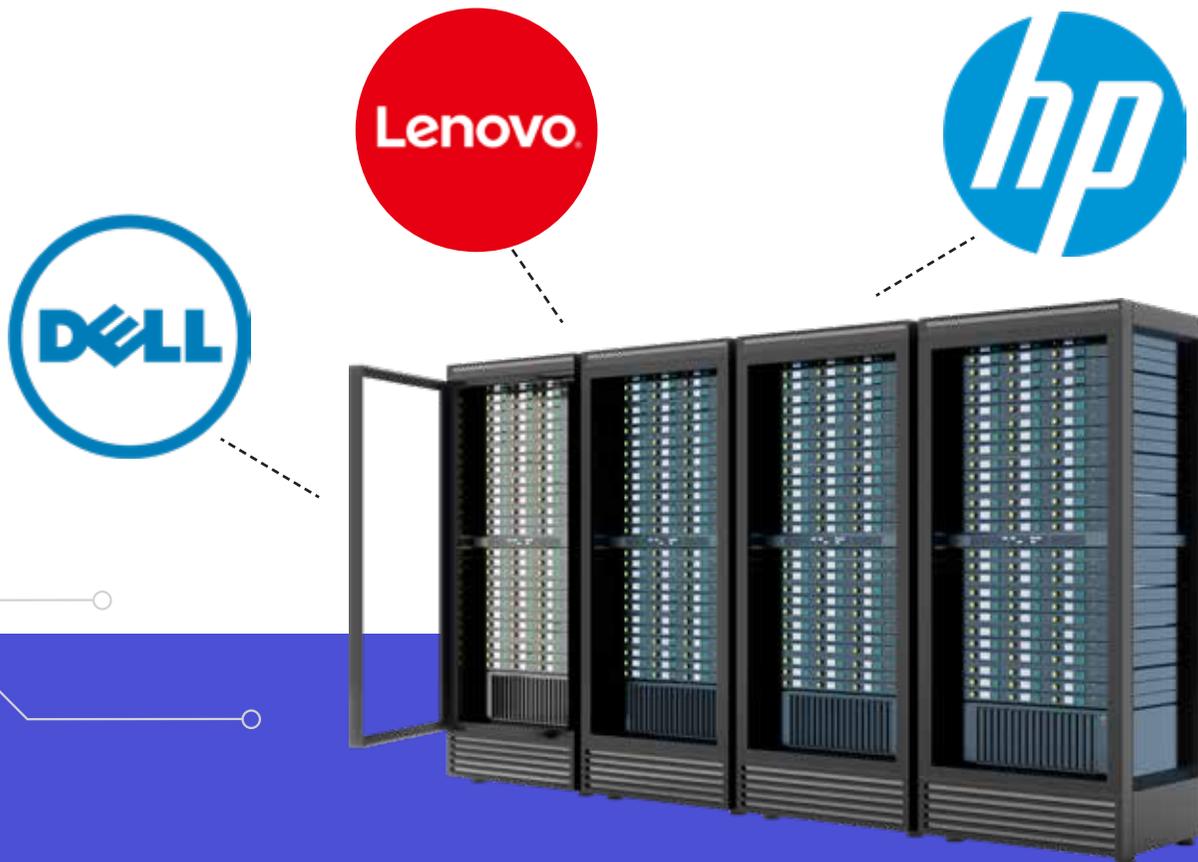

01

Desktops & workstations are the lifelines of business operations. Engineered with the enterprise in mind, we have partnered with leading global brands that offer you high-end security, optimal expandability in one sleek, modern design and affordable prices.

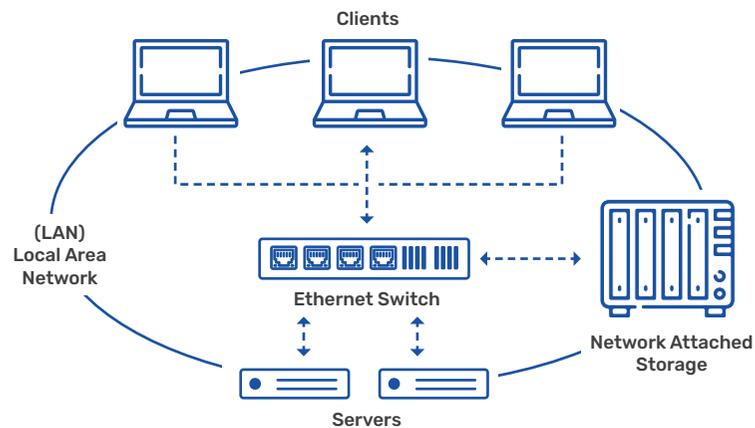

SERVERS

Servers are designed to be 24/7 workhorses – always on. We’ve, therefore, partnered with the trusted brands in the industry to build a dedicated resource center for businesses that covers all aspects of their IT needs, including buying their first server.

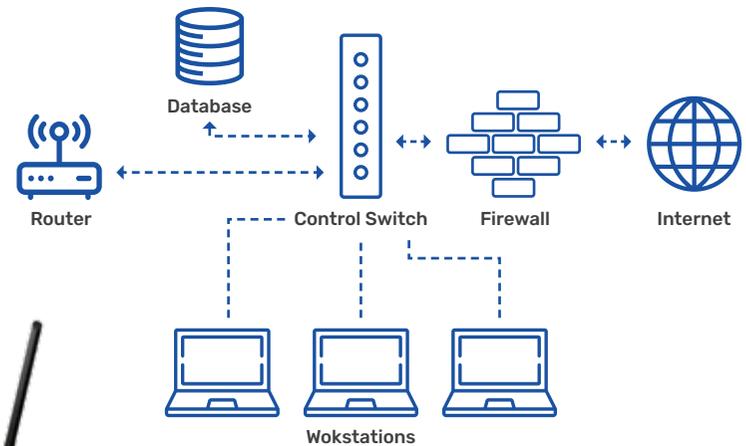

Network Attached Storage (NAS) is one of the safest and most efficient ways to backup and store your business's important files. We have partnered with leading brands for data and network storage solutions ensure you enhanced security. Get real-time prices, availability and thousands of products to choose from global brands.

NETWORK ACTIVE PRODUCTS

The future of work is hybrid. Grow with the latest IT solutions that keep your employees and customers connected everywhere. Simple solutions help to solve complex IT problems. Thus, We have partnered with the best global brands to strengthen your business today and prepare for tomorrow.

NETWORK

PASSIVE PRODUCTS

Harnessing the power of technologies requires businesses to overcome complex systems integration challenges. Systems Integration is the process of connecting the systems and applications across an organization to deliver efficiency, enhanced functionality, and cost savings for the recipient organization. SFT's system integration services resolve disconnects between the different business systems you leverage. UTM FIREWALL & SECURITY

Unified Threat Management (UTM), a Next-Generation Firewall (NGFW) today, provide multiple security features and services in a single device or service on the network. Rely on globally acclaimed experts to find your network's users protected with several different features, like antivirus, content filtering, email and web filtering, anti-spam, and more.

ANTIVIRUS

We help to block hackers from your devices, keep your online activity private and protect your identity, all-in-one. With advanced protection, we help you safeguard your privacy, connect securely, speed up devices, and stay safe from cybercrime by partnering with globally leading brands.

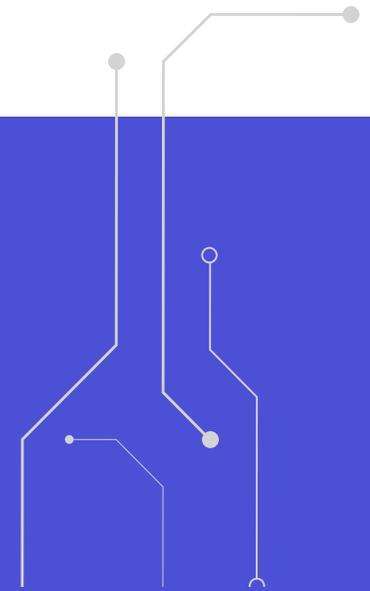

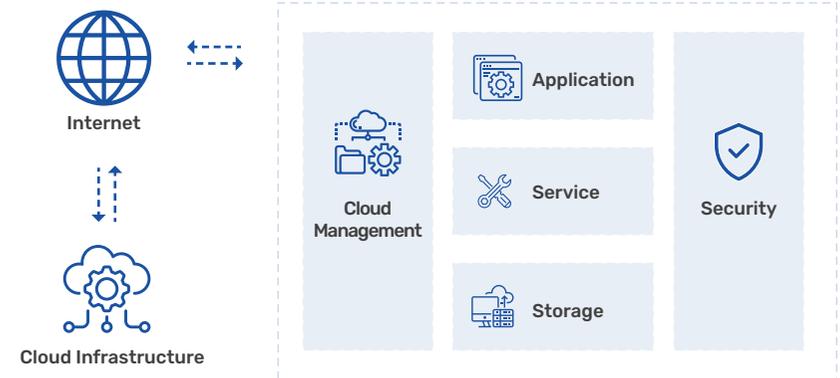

OPERATING SYSTEM

PCs, laptops, tablets, smartphones, and servers require an OS. Discover the best global brands we have partnered with to spearhead your business operations or personal requirements.

Cloud Service providers are vendors which provide Information Technology (IT) as a service over the Internet. Our cloud service partners can reduce business process costs when compared to on-premise IT.

IP PHONE & IP PBX

Voice-over internet protocol (VoIP) software uses an IP network to transmit phone calls seamlessly without the need to connect to an extra telephone network. It is a modern form of PBX or private box exchange. We have partnered with a global communication technology giant to make this possible for businesses.

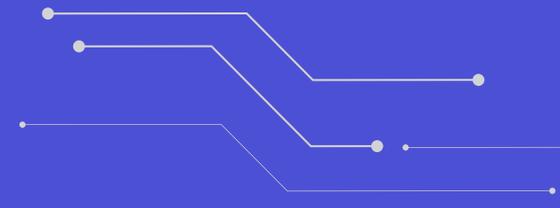

CCTV SURVEILLANCE SYSTEM

Surveillance systems are an essential part of securing your home or business. These systems can range from wireless home security cameras to sophisticated alarm systems that notify law enforcement at the first sign of trouble. The global brands we have partnered with offer you this fortified security network.
